

# Why Cloud30?

Cloud30 has been specifically designed for SME's by an SME with nearly 20 years experience delivering SME IT solutions.

Fully managed migration; we will help you every step of the way move from conventional IT to modern cloud based computing.

Cloud30 uses Microsoft Office (licensed separately).

Comprehensive. Cloud30 takes all the leading cloud technologies & turns them into a complete SME cloud IT solution.

Cloud30 is inexpensive; £49.99 setup, £31.49 per user per month.

Cloud30 is not like any other cloud solution you've seen before. Our USP's are;

Firstly, you stay in control of your data. With Cloud30 your files are on your PC as well as securely shared with your colleagues online.

Cloud30 is not a one size fits all solution – it's a business solution specifically devised for the SME. So if you are a small business – it's intended for you.

Your staff might not even know they are using cloud technology. Cloud30 uses Microsoft Office & standard files & folders – all the cloud technology works in the background.

We are real people providing real support on a real helpdesk in Preston ready to take your technical support calls & resolve any Cloud30 issues.
