"Apart from which legal software to use, we didn't know what we needed. We were delighted when in 2003 we were introduced to A & N. From day one, they gave us exactly what we had hoped for; honest & fair IT systems advice.

Based around Microsoft Small Business Server, A & N installed/implemented our IT systems platform. We are very happy with our IT. We very rarely have any problems & on the odd occasion that something has gone wrong, A & N Business Computer Systems have fixed it straight away."
